CONTENTS

The Third Japan-US Conference on Biostatistics in the Study of Human Cancer

K. Aoki, D. G. Hoel, and T. Yanagawa. Preface 3

Data Management

C. F. Starmer and M. A. Dietz. Managing clinical research data: software tools for hypothesis exploration 5

Y. Ohashi. Randomization in cancer clinical trials: permutation test and development of a computer program 13

Cohort Studies

S. Akiba and T. Hirayama. Cigarette smoking and cancer mortality risk in Japanese men and women—results from reanalysis of the six-prefecture cohort study data 19

W. Mack, B. Langholz, and D. C. Thomas. Survival models for familial aggregation of cancer 27

A. Shibata, A. Asano, N. Hamajima, R. Sasaki, K. Aoki, H. Yokoyama, and Y. Yokoyama. Family history of cancer and mortality among patients gastrectomized because of benign gastric diseases 37

Clinical Studies and Screening

R. Brookmeyer. Statistical problems in epidemiologic studies of the natural history of disease 43

T. Kuroishi, K. Hirose, and S. Tominaga. Evaluation of the effectiveness of mass screening for uterine cancer in Japan: the potential years of life lost 51

T. Sobue, T. Suzuki, I. Fujimoto, N. Yokoi, and T. Naruke. Population-based case-control study on cancer screening 57

Measurement Errors

N. Yamaguchi, T. Yanagawa, T. Yoshimura, N. Kohrogi, K. Tanaka, Y. Nakamura, and T. Okubo. Use of tumor diameter to estimate the growth kinetics of cancer and sensitivity of screening tests 63

M. D. Begg and S. Lagakos. On the consequences of model misspecification in logistic regression ... 69

T. Yanagawa and S. Tokudome. Use of screening tests to assess cancer risk and to estimate the risk of adult T-cell leukemia/lymphoma 77

Statistical Inference on Cancer Risks

M. Vaeth and D. A. Pierce. Calculating excess lifetime risk in relative risk models 83

T. Sato. Confidence intervals for effect parameters common in cancer epidemiology 95

T. W. O'Gorman, R. F. Woolson, M. P. Jones, and J. H. Lemke. Statistical analysis of K 2 × 2 tables: a comparative study of estimators/test statistics for association and homogeneity 103

Application of Nonparametric Smoothing

T. Yanagimoto and N. Kashiwagi. Empirical Bayes methods for smoothing data and for simultaneous estimation of many parameters 109

M. Ohtaki, D.-K. Kim, and M. Munaka. A nonparametric method for estimating interaction effect of age and period on mortality 115

Risk Assessment Models

D. G. Hoel and G. E. Dinse. Using mortality data to estimate radiation effects on breast cancer incidence 123

Y. Fujii. Models for association in bivariate survival data 131

T. Hashimoto, M. Ohtaki, N. Kamada, H. Yamamoto, and M. Munaka. Application of log-linear model in inference on karyotypic evolution in chronic myelocytic leukemia 135

H. Origasa and J. D. Knoke. A comparative study of two statistical models for the analysis of binary data from longitudinal studies 143

M. Matsuura and S. Eguchi. Estimation of gene frequency and test for Hardy-Weinberg equilibrium in the HLA system 149

T. Tango. An index for cancer clustering 157

D. C. Thomas. A model for dose rate and duration of exposure effects in radiation carcinogenesis 163

I. Yoshimura. The effect of measurement error on the dose-response curve 173

Symposium on Structural Properties for Determining Mechanisms of Toxic Action

S. P. Bradbury and R. L. Lipnick. Introduction: Structural Properties for Determining Mechanisms of Toxic Action 181

C. M. Auer, J. V. Nabholz, and K. P. Baetcke. Mode of action and the assessment of chemical hazards in the presence of limited data: use of structure-activity relationships (SAR) under TSCA, Section 5 183

N. P. Franks and W. R. Lieb. Mechanisms of general anesthesia 199

G. D. Veith and S. J. Broderius. Rules for distinguishing toxicants that cause type I and type II narcosis syndromes 207

H. Terada. Uncouplers of oxidative phosphorylation 213

J. L. M. Hermens. Electrophiles and acute toxicity to fish 219

R. M. Carlson. Assessment of the propensity for covalent binding of electrophiles to biological substrates 227

F. F. Kadlubar, P. P. Fu, H. Jung, A. U. Shaikh, and F. A. Beland. The metabolic *N*-oxidation of carcinogenic arylamines in relation to nitrogen charge density and oxidation potential 233

R. P. Mason. Redox cycling of radical anion metabolites of toxic chemicals and drugs and the Marcus theory of electron transfer 237

T. R. Fukuto. Mechanism of action of organophosphorus and carbamate insecticides 245

J. R. Coats. Mechanisms of toxic action and structure-activity relationships for organochlorine and synthetic pyrethroid insecticides 255

S. O. Duke. Overview of herbicide mechanisms of action 263

Contributed Articles

H. L. Howe. Predicting public concern regarding toxic substances in the environment 275

R. Lauwerys, A. Amery, A. Bernard, P. Bruaux, J.-P. Buchet, F. Claeys, P. De Plaen, G. Ducoffre, R. Fagard, P. Lijnen, L. Nick, H. Roels, D. Rondia, A. Saint-Remy, F. Sartor, and J. Straessen. Health effects of environmental exposure to cadmium: objectives, design and organization of the cadmibel study: a cross-sectional morbidity study carried out in Belgium from 1985 to 1989 283

R. G. Stevens and D. R. Kalkwarf. Iron, radiation, and cancer 291

T. Damstra and Y. Kurokawa. U.S.-Japan Joint Meeting on the Toxicological Characterization of Environmental Chemicals of Mutual Interest 301

Y. Kurokawa, A. Maekawa, M. Takahashi, and Y. Hayashi. Toxicity and carcinogenicity of potassium bromate—a new renal carcinogen 309

B. L. Razzaboni and P. Bolsaitis. Evidence of an oxidative mechanism for the hemolytic activity of silica particles 337

Published Volumes of EHP 343

Instructions to Authors 345
